

FAUX HARDWARE is also available for use with non-functional shutters and other decorative applications. It provides a traditional look for merely decorative shutters at a fraction of the cost of functional hardware. Faux hinges (204532) and faux scroll shutter dogs (204535) are commonly used with stationary vinyl or wood shutters. Faux spade and strap hinges are not usually used on shutters because they are not visible, but are instead used on doors, garage doors, and gates.
