

**CLARK'S TIP HINGES** are nearly identical in operation to Acme, Lull & Porter hinges but are surface-mounted.

They are commonly used when there is not adequate wood exposed to use an edge-mount hinge. Throw is measured for this hinge in the same way it is measured for a strap hinge. To the left, a throw measurement of 3 1/4 inches is shown

with the hinge in the open position. The pintle half is mounted to the window with the pintle pointing up.
